Cook Inlet Region 401(k) Retirement Plan: In order to assist employees in saving for retirement and reduce taxable income, CIRI established the Cook Inlet Region 401(k) Retirement Plan ("Plan"). The Plan adopted by your employer includes deferral contributions as pre-tax or Roth elements, a non-discretionary employer match element (safe harbor match) and a discretionary employer funded element. An employee becomes eligible to participate in the Plan immediately and will be automatically enrolled with an employee pretax contribution percentage of 4% of compensation unless otherwise elected.

Employees may contribute from 1% to 85% of their eligible compensation into the Plan. Employees may change contribution percentages at the beginning of each pay period. Participating employees are 100% vested in their contributions at all times.

Participating employees who contribute to the Plan's deferral contribution element, and who meet eligibility requirements, will receive an annual safe harbor matching contribution based upon their deferral contributions. To be eligible to receive a safe harbor matching contribution, an employee must be employed for 12 months and have worked at least 1,000 hours. The employer matching amount will equal 100% of the employee's deferral contribution, subject to the first 4% of eligible compensation. Eligible employees are 100% vested in the employer match at all times.

Employees who meet eligibility requirements may receive an annual discretionary contribution if approved by your employer. Eligible employees become 100% vested in the discretionary employer contribution element once they have completed 3 years of service. Initial eligibility requirements are identical to the safe harbor matching contribution requirements. Additionally, to receive an annual discretionary contribution, an employee must have worked at least 500 hours during the Plan year and be employed on 12/31.

All 401(k) employee deferral contributions, employer 401(k) safe harbor match and discretionary employer contributions are deposited in the participating employee's tax-deferred savings accounts at Fidelity Investments. Participating employees direct the investment of their funds. Allocations between funds can be made on a daily basis.

Employees should list their 401(k) beneficiaries as soon as possible. Beneficiary designations for the 401(k) are separate from other benefits beneficiaries (such as life insurance).
